

Going above and beyond to create innovative, customized

# Solutions.

We make the world safer and more productive.

Concurrent Technologies Corporation (CTC) is an independent, nonprofit, applied scientific research and development professional services organization.

Together with our affiliates, **Enterprise Ventures Corporation (EVC)** and **CTC Foundation**, we leverage research, development, test and evaluation work to provide transformative, full lifecycle solutions. To best serve our clients' needs, we offer the complete ability to fully design, develop, test, prototype, and build.

We work side by side with our clients, providing personal attention to every project, regardless of size or scope.

### Dedicated to Excellence

- ISO 9001:2008—Quality
- 14001:2004—Environmental
- OSHA VPP Star—Health & Safety
- AS9100—Aerospace Activities (certification held by EVC)

### Contract Vehicles/Partnerships

CTC offers a diverse portfolio of contract vehicles under which clients may obtain our services. We are a member of numerous consortiums, alliances and associations. In addition, we partner with academia and other nonprofit, research-based organizations to develop innovative solutions to solve our clients' toughest challenges. Visit our website or contact us for information.

## What we do:

### Advanced Engineering & Manufacturing

- Additive Manufacturing Product and Process Development
- Advanced Joining Technologies
- Manufacturing Process Development and Optimization
- Vehicle & Platform Subsystem Design, Prototyping, Test and Integration
- Combat Survivability Technologies
- Material Characterization and Testing
- Corrosion and Coating Solutions

### Energy & Environment

- Environmental & Process Engineering
- Infrastructure Energy
- Operational Energy
- Water Recycling Technologies
- Safety and Environmental Health Services
- Strategic Advisory Services
- Energetic Materials

### Advanced Intelligence

- Advanced Visualization (2D, 3D and 4D)
- Anticipatory Intelligence
- Big Data Management and Analytics
- C4ISR
- Cloud Migration and Integration
- Multi-INT TCPED Solutions

### Secure Information Technology

- Cloud Computing/Software as a Service
- Decision Support Systems
- Immersive Environments
- Next Generation Cross-Domain Solutions
- Next-Generation Remote Access and Mobile Solutions
- Secure Multi-Media Filtering

### Readiness & Training

- Readiness Tools and Support
- Continuity of Operations Support
- Identity, Credential and Access Management (ICAM) Engineering
- Education, Training & Outreach Services
- Exercise Design and Development
