Cybersecurity Maturity Model Certification

Is Your Organization Ready to Meet the Required DoW CMMC

Cybersecurity Maturity Model Certification (CMMC) remains essential for organizations in the DoW supply chain. Although the DoW CIO has temporarily paused Level 2 third-party certification assessments while conducting a review of the CMMC program, organizations should continue preparing for CMMC compliance. Level 2 self-assessment requirements remain in effect, and third-party certification requirements are expected to resume once the DoW CIO's review is complete.

Because achieving and maintaining CMMC compliance can take 12–24 months, organizations should begin preparing as early as possible. This additional time allows organizations to identify and address compliance gaps, strengthen their cybersecurity posture, and implement the processes and controls needed for certification. By investing in CMMC readiness now, organizations will be well positioned when third-party assessments resume and future contract requirements take effect.

How CTC Can Help

Concurrent Technologies Corporation (CTC) offers expert guidance to help your organization achieve CMMC compliance. Our services include:

- Objective assessments of your cybersecurity preparedness
- Identification of gaps in security practices
- Pre-assessment testing to ensure readiness (prior to C3PAO assessment)
- Consultations with certified CMMC assessors

Pennsylvania businesses can access grant funded help through the PA Cybersecurity Resource Center to prepare for CMMC compliance.

As an organization, CTC has successfully achieved CMMC Level 2 certification, demonstrating our commitment to safeguarding national security and protecting the Defense Industrial Base. This milestone reflects the strength of our cybersecurity program and demonstrates our eligibility to assist others with CMMC compliance.

CTC Concurrent Technologies Corporation

Why CTC?

Our Cybersecurity experts have decades of experience building and leading cybersecurity programs. Further, our status as an independent non-profit organization makes us uniquely qualified to help your company achieve the appropriate CMMC level. We recommend solutions, not products!

CMMC Cybersecurity Services

Strategic Consulting

Our team will identify areas of risk to your organization and define a path forward, while explaining risk in terms that senior leadership can understand.

Vulnerability Management

A Vulnerability Management Program is the linchpin of your organization's success. Our team will develop a program that enables you to identify, report, and resolve risk. Properly executed programs require coordination between IT departments, security teams, senior leadership, and risk management.

Security Engineering

Our engineers work hand in hand with your team members to implement technical solutions within your organization. Some examples of this include a review of security configurations for technologies in use by your organization.

Concurrent Technologies Corporation (CTC) is an independent, nonprofit, applied scientific research and development professional services organization. CTC collaborates with its technology transition affiliate, Enterprise Ventures Corporation, to leverage research, development, test and evaluation work to provide transformative, full life-cycle solutions. To best serve our clients' needs, we offer the complete ability to fully design, develop, test, prototype and build. We deliver robust, technical, and innovative solutions that safeguard our national security, retain U.S. technological advantage, and ensure the primacy of American manufacturing.
