Logistics and Program Management Support

Improving enterprise operations through in-depth logistics and program management expertise

Concurrent Technologies Corporation (CTC) provides support to manage worldwide logistics and systems programs for government clients, helping them develop, oversee, analyze, and improve their enterprise operations at a competitive cost. We analyze needs, highlight gaps, and support solutions for program and mission success. We work as teammates, with skilled, professional staff to bring you the right knowledge and experience in analytical, technical, and programmatic services.
