Marine Corps Installations Command (MCICOM) Professional Services Support (PSS)

Multiple Award Task Order Contract (MATOC)

Background

The primary purpose of this requirement is to provide a range of professional programmatic support services to the major directorates within the MCICOM Headquarters. This includes diverse professional services essential for supporting the professional needs of MCICOM HQ and its Directorates. Solicitation M9549424R0002 was issued seeking contractor support services to assist in carrying out tasks to support MCICOM HQ through the various directorates.

Major task areas include support for:

- Program Management
- Logistics
- Installation Communications Program
- Operations
- Planning
- Government and External Affairs
- Facilities

Contractor Awards

In November 2024, MCICOM awarded ten (10) companies positions on a five-year, $164.5 million shared-capacity contract to provide professional services to the Marine Corps command responsible for overseeing the service branch's many sites around the world.

Concurrent Technologies Corporation (CTC) was selected by MCICOM as a prime contractor.

Ordering Period

The ordering period of the basic IDIQ is five (5) years beginning on the period of performance start date of November 6, 2024.

Task Order Development Process

Concurrent Technologies Corporation

Concurrent Technologies Corporation (CTC) is an independent, nonprofit, professional services organization with proven experience and demonstrated performance. We have partnered with MCICOM over the past seven years as a prime contractor. We are currently embedded vertically across the organization providing support at the Headquarter (HQ), regional, and installation levels and horizontally across the enterprise through established working relationships within Facilities Directorate (GF)-Public Works (PW), GF-Capital Investments, GF-Asset Management, GF-Environmental, Logistics and Services, Ops and Plans, Modernization and Development, Comptroller (G8), and Plans, Policies and Operations.

CTC Concurrent Technologies Corporation

Team CTC

To provide MCICOM the depth and breadth of professional services support it requires, we have hand-picked a uniquely experienced and familiar team (Team CTC) that enjoys significant capability and experience in all four task areas as shown below. Teammates can be added if a capability is needed for task order execution.

Team CTC's combined capabilities and project experience is relevant to all task areas under Lot 1, providing abundant resources for Task Orders.

Arlo provides Technical Program Management, Policy and Governance, Physical Security, and Logistics Support to USMC Systems Command and DoD clients.

Essnova provides a broad range of professional, scientific, technical and administrative support services to the federal, state, local and educational organizations.

CANA provides logistics systems integration, applied analytics services, and software solutions within Headquarters Marine Corps (HQMC) Installations & Logistics (I&L) and across multiple industries and markets.

Peridot provides financial, contract management, acquisition, operations, and program/project management support services to the USMC and DoD.

Cask is at the forefront of digital engineering, providing cutting-edge solutions to the USMC and DoD clients seeking to modernize their technical infrastructure.

Redhorse leverages techniques in data analytics, cognitive computing and digital services to provide acquisition, program management and enterprise solutions with global implications.

CTC serves as an objective advisor to analyze, evaluate, and inform decisions regarding strategic alternatives to MCICOM as a prime contractor.

RMC provides Mission Assurance expertise and continuously improves analyses, assessments, methodologies, and recommendations to protect Department of Defense (DoD) missions.

Deloitte is the largest professional services firm in the world, with over 345,000 personnel around the globe providing expertise to many locations where the United States Marine Corps (USMC) operates.

The Building People is a recognized leader in real estate, energy and engineering consulting, and facilities services which integrates technology, buildings, and people.
